

Seismic Risk Maps

Enrichment Activity

The map below shows the portions of the United States most likely to experience an earthquake. Study the map and its key. Then, use the map to answer the questions.

1. In which states is the chance of an earthquake occurring most unlikely? _____

2. Are earthquakes more likely to occur in Nevada or Michigan? _____

3. Which section of the country is most likely to experience an earthquake? _____

4. Which section of the country is least likely to experience an earthquake? _____

5. Are inland areas or coastline areas more likely to experience earthquakes? _____

6. What is the likelihood of an earthquake occurring in the state in which you live? Explain. _____
